Inspirational guide

Melamine

FINSA

20—22

The material is where it all starts, the substance that things are made of. It can be transformed to create something totally new. There are many professionals whose work in this process is essential. The skill of the carpenter, the creativity of the designer, the transformation of the manufacturer and the service of the distributor... They all find a selection of designs and finishes in Gama Duo that have been carefully prepared to enhance the value of melamine as a material for our spaces.

At Finsa we believe in the transforming power of design and we invite you to use this Inspiration Guide to discover the potential of Gama Duo for the latest trends and the spaces we live in, as much more than just a material. It is the starting point for developing new ideas, it is the tool that allows us to imagine and create.

Natural equilibrium

9

In a hyper-connected world that moves forward at a dizzying pace, the concern in our society to lead a healthy life is constantly increasing.

There is a direct relation between our surroundings and our well-being, so interior design is a fundamental tool for creating spaces where we feel serene and comfortable.

Materials inspired by the purest states of nature are our most obvious reference in our search for harmony. Natural wood and textiles with minimal treatment, smooth plain stone and light colours, especially shades of green, have a fundamental role in this style.

Your style, your space

Our home is our refuge, the only space where we have real control and where we can express ourselves freely.

21

Styles and fashions guide us and invite us to experiment creatively with space. We must take into account that styles are becoming less and less defined because the main overall trend is towards personalised spaces.

The choice of furniture, lighting, textiles and decorative elements make all the difference when creating a unique setting that expresses our values and desires.

Inspire your dreams

30

The bedroom is our most intimate space, our inner sanctuary, the place we revive and dream, where we prepare ourselves to face each new day.

Whether at home or in a hotel, the right materials for the room are the ones that help us to unwind and project a relaxed, serene ambience, without sacrificing glamour or sophistication.

The impact of a design with personality.

Everything in order

45

Order and cleanliness are more contemporary than ever. An orderly home helps us to better organize our time and therefore contributes to increasing our happiness.

Storage systems and elements adapt to our new requirements and enable us to keep our belongings hidden or in view, but always within reach and under control. This is why design is so important.

Style and order are perfectly compatible. Traditional fabrics and leather applied to interiors leave space for the visual force of wood and the industrial character of metal.

Better together

Meeting places, whether public or private, for leisure or work, need to be redefined for the digital age.

We are more comfortable in surroundings that help us socialize but also help us to focus and enjoy a certain degree of privacy.

Modular systems offer flexibility, comfortable armchairs that let us feel at home, lively colours that inspire creativity, large tables that invite us to share... these are all essential ingredients to encourage us to interact with each other.

COMPLEMENTARY PRODUCTS LAMINATES AND EDGING

There are matching laminates and edgings available for each décor in the GAMA DUO range, available from melamine accessory suppliers approved by FINSA. Visit our web page for the different possibilities.

GAMA DUO OFFER

PREFERRED OFFER

Recommended décor / texture combinations readily available in pack quantities.

FLEXIBLE OFFER

It is possible to order any décor / texture combination from the GAMA DUO, also available in pack quantities. Ask your sales office for conditions.

QUALITY AND ENVIRONMENTAL CERTIFICATIONS

TRANSPARENCY: ECOLOGICAL PRODUCT FOOTPRINT

The Environmental Product Declaration (EPD) is a tool for passing on clear and transparent information on the environmental impact of a certain product during all stages of its life cycle. In FINSA's case it confirms that the wood is a material which maintains its captured level of greenhouse gases through our production process.

APP GAMA DUO

1°
Access the following website:
www.gamaduo.finsa.com using your smartphone or tablet and download the GAMA DUO APP or visit the "App Store" or "Google Play" and download the GAMA DUO APP.

2°
Open the app.

3°
Then, search the décor to access all the information.
